# Land Between the Lakes GOLDEN POND PLANETARIUM SCHEDULE 2018

## SEPTEMBER - NOVEMBER

### Daily Planetarium Shows:

\$6.00 Adults | \$3.50 Children  
under 5 years are free

Friends of Land Between the Lakes members receive \$1 off admission to planetarium shows and 10% off in our gift shops.

To become a member ask your gift shop clerk or visit [www.friendsofbl.org](http://www.friendsofbl.org)

For group reservations call  
Monday-Friday 270.924.2020

Golden Pond Planetarium: 270.924.2243 270.924.2237  
238 Visitor Center Drive | Golden Pond, KY | 42211

### Two Small Pieces of Glass

Each member of your family can tag along with two teenagers to a Star Party where they learn how the telescope has helped us understand space and how telescopes expand our understanding of the Universe. While looking through the astronomer's telescope we explore the Galilean Moons, Saturn's rings, and galaxies. A great full-dome show for those who may be considering a telescope purchase.

### Laser Legends of the Night Sky

Children and adults will enjoy this animated laser show where Aesop the owl will lead you on a light-hearted look at the Greek mythology associated with some of the constellations. This includes the stories behind the mighty warrior Perseus; the beautiful princess Andromeda; Cetus, the terrible sea monster, Scorpio the scorpion; and Orion the hunter. A non-laser full-dome version of this show is also available.

### From Earth to the Universe

Please come and enjoy the many beautiful full-dome images of our universe on this virtual space tour as seen from the eyes of the world's largest telescopes including the Hubble Space Telescope. Along the way, you will learn about the history of astronomy, the invention of the telescope, and see impressive images from today's giant telescopes that allow us to probe ever deeper into the Universe.

### Earth, Moon & Sun

The entire family will enjoy discovering the secrets about our home planet and its most familiar neighbors with the help of Coyote, an amusing character adapted from Native American oral traditions, who has many misconceptions about how these three celestial objects interact. Laugh out loud as Coyote attempts to explain how the moon and sun always appear to astound us with their celestial antics.

### Firefall

If you have ever enjoyed a meteor shower or made a wish upon a "shooting star", you will enjoy this full dome presentation. All aspects of meteor showers are explored in vivid detail. Where meteors come from, what they are made of, past impact evidence, and possible future impact predictions may surprise you. Comets and asteroids are also discussed making this show about anything that could fall on your head!

### Tonight's Sky-Live

Somewhere along the line, planetariums became cool shaped movie theaters and the technology got ahead of the message. You are invited to quietly relax under a canopy of stars that represent tonight's sky. As you do, our knowledgeable and entertaining staff will personally lead you on a tour of planets, constellations, and special celestial events. This live presentation is recommended for ages 6 and above.

### Wildest Weather in the Solar System

Teens, adults, and even children can appreciate this full-dome presentation from National Geographic. Join us aboard the imaginary space ship Erion as you journey through our solar system looking for the planet with the wildest weather. Witness the most beautiful, powerful, and mysterious weather phenomena in the solar system! Once enlightened, you will most assuredly be thankful that we live on Earth!

### Back to the Moon for Good

Your family will enjoy this full-dome presentation narrated by Tim Allen. Right now there is a new space race going on as teams of young scientists all around the globe compete for 30 million dollars in prize money offered by Google to see who will be the first private organization to land a rover on the moon in 2018. Not since the Apollo missions 40 years ago has there been this much lunar exploration.

### Planetarium Projector Project

Help us keep our planetarium running. Our projector is out of date and the parts can no longer be replaced. Donate today to continue providing education to our visitors and school children.
